BUDGET CONSIDERATIONS

Construction projects rarely proceed exactly as initially designed and quoted. Unforeseen complications and decisions during construction can affect costs, which vary based on site conditions, project size, finishes, and more. Pavers and wall products may only account for 20% of the total cost. Choose products you'll enjoy long-term without compromising.

**Depending on site conditions, design decisions and overall scope.*

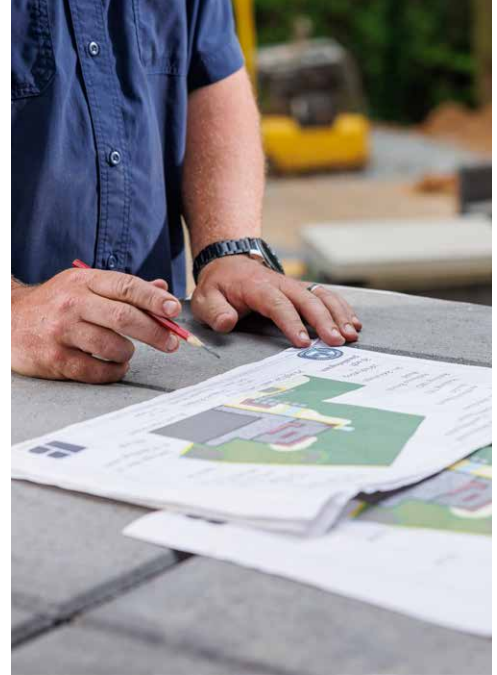

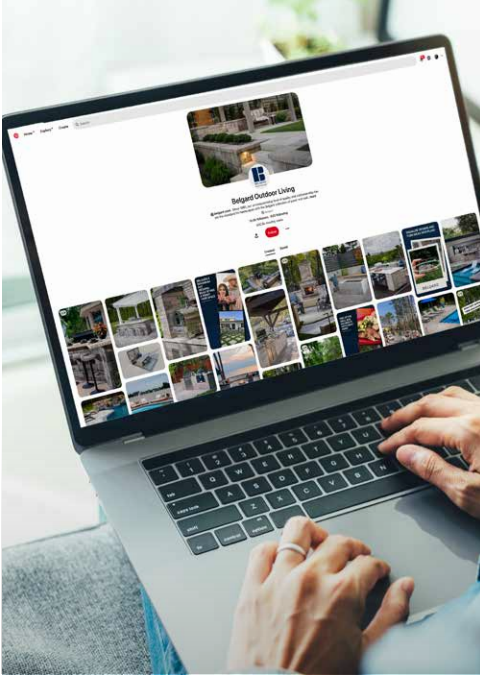

CUSTOMIZING YOUR SPACE

Expanding the project footprint or adding features can raise costs but also significantly boost functionality and enjoyment. Popular upgrades include shade, lighting, fire features, and cooking areas. Work with your contractor to optimize your space within budget, explore financing options, or plan phased construction over time.
