Reduce water demand for landscaping by designing a permeable paver system that harvests and recycles rainwater.

### ELIMINATE STANDING WATER

Improve site drainage to avoid pooling water where mosquitos can breed.

### REPLENISH AQUIFERS

Permeable pavers filter water, removing contaminants and ensuring receiving waters and ecosystems are self-sustaining.

### MANAGE RUNOFF

Aid landscaping by reducing erosion that occurs when grass is dry or dead.

### FLOOD PREVENTION

Permeable pavers can absorb rainwater at a rate of over 500 inches per hour, eliminating runoff.

# BUDGET CONSIDERATIONS

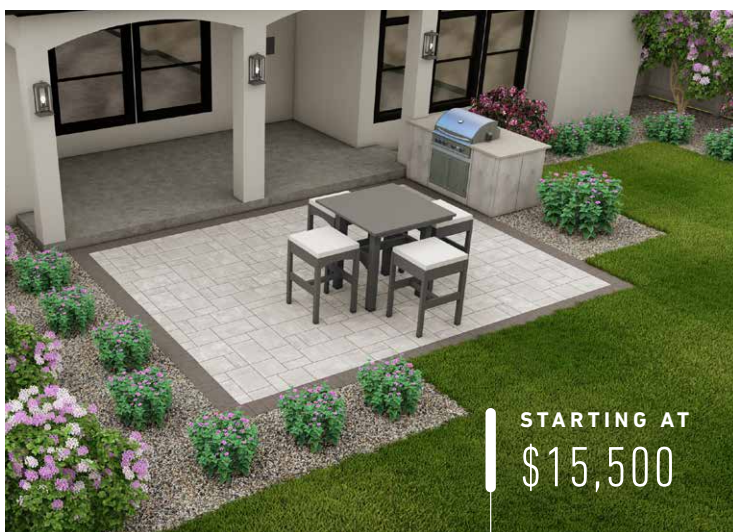

Construction projects rarely proceed exactly as initially designed and quoted. Unforeseen complications and decisions during construction can affect costs, which vary based on site conditions, project size, finishes, and more. Pavers and wall products may only account for 20% of the total cost. Choose products you'll enjoy long-term without compromising.
