## STRAIGHT FACE RETAINING WALL

A LIGHTWEIGHT SOLUTION FOR  
SEGMENTAL RETAINING WALLS  
WITH A WEATHERED STONE LOOK

### 🔗 FEATURES & BENEFITS

- All system components are standard-split in-line
- Rear lip locators easily establish a uniform wall batter
- A matching cap and corner completes the system
- Build gravity walls up to 3 feet 6 inches high\*, including the buried course.
- Taller walls can be built using geosynthetic reinforcement when designed by a qualified engineer.
- Minimum outside radius, measured on the top course to the front of the units: 3 feet
- Minimum inside radius, measured on the base course to the front of the units: 6 feet
